DETAILED ACTION

1. Applicant's Information Disclosure Statement (IDS) has been considered by the examiner.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 – 37 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Evidence that claims 1 – 37 fail(s) to correspond in scope with that which applicant(s) regard as the invention can be found in the specification (page 6, lines 25 – 29) filed December 02, 2003. In that paper, applicant has stated that the second voltage pump circuit is coupled to the remaining x-decoder circuit to provide word line voltages to the remaining memory device array locations, and this statement indicates that the invention is different from what is defined in the claim(s) because claims 1, 16, and 32 claim two distinct address decoders (first address decoder coupled to the boot block and second address decoder circuit coupled to the additional cell block) associated with the word lines, which implicitly relate to the x-decoder. According to the specification, there is only one x-decoder whose functions are to couple a first voltage pump circuit to provide a word line voltage signal to the boot block, and to couple a second voltage pump to the additional memory cell block to provide a word line voltage signal to the additional memory cell block.

Correction is required in order to overcome this type of rejection, and to potentially place the claims in condition for allowance.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
5. When responding to the office action, Applicant(s) are advised to provide the examiner with the page and line numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.
